

## **Moving your Wholesaler Installation to a New Computer**

Normally I would advocate installing TeamViewer (which you can download for free) onto the new computer so that I can do it remotely for you. If you want to do it yourself, follow these instructions :-

1. unzip your backed-up data into C:\WSALER on the new computer.
2. Open the baker.ini file in this folder and delete the lines below [USERS] as far as the next [ ] heading. Save the file.
3. Open your web browser and enter the url “[www.selectdata.co.uk/aws32/install32.exe](http://www.selectdata.co.uk/aws32/install32.exe)”. This will download the installation file for the programme. Do NOT try to download the demo version.
4. Run the downloaded file (install32.exe) and it will install the programme and put an icon on your desktop.
5. Run the programme by double-clicking the icon and it will download the latest update before opening.

All is now set up to run.

If you have trouble in doing this, I am here most mornings between 9.00 and 11.30 am and part of the afternoons and evenings. If you email me and let me know when you require help I will arrange to be here.
